Lighting & Control Solutions
# Warehouse & Logistics

## Lighting Control & Building Automation

**Lynxus Technologies** offers the leading open source wireless controls solution which delivers for energy savings and operational efficiency in a simplified, cost-effective manner.
Lynxus helps facilities run more efficiently and with increased productivity while also providing a platform for the Internet of Things.
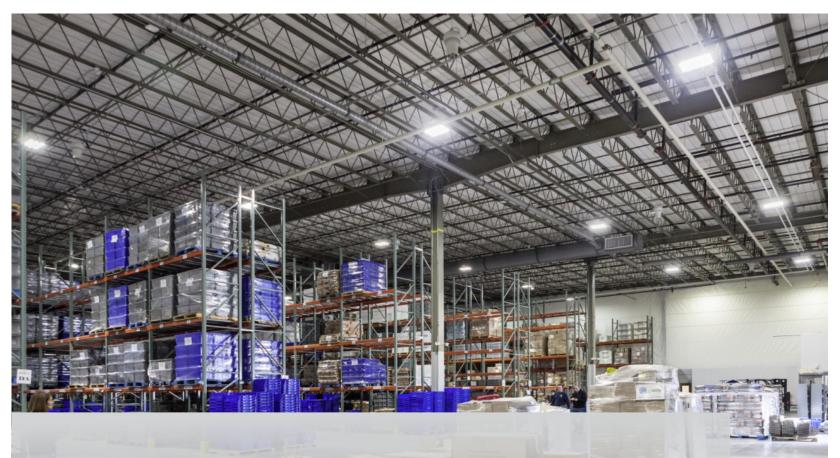

**Features:**

- Powerful control strategies including scheduling, task tunning, occupancy, daylight harvesting.
- Reliable, secure, zigBee wireless mesh network
- Real-time, measurable Power Metering
- OpenADR integration
- Simple and intuitive local interface

# Strategies for the future

## Lighting where you need it, when you need it.

The **Lynxus Control Strategy** offers comprehensive, scalable and flexible lighting controls for commercial applications. Our products, programs, and services are **ASHRAE 90.1** and **IECC 2015 compliant.**

- Utility Grade Power Monitoring
- True On/Off functionality via internal relay
- Auxiliary output for optional external relay
- zigbee 3.0 Mesh Networking
- Easily integrates with the zigbee Open Source
- Internal relay at 15A
- Class 2/0-10V and 4 Channel PWM
- Dual 12-24V Occupancy Sensor and Photocell
- Secure, over-the-air upgrades to support future enhancements
- Default to "On"
